**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Burns et al. (US 6,370,812).

Burns et al. anticipate a compacted composition and a method of making a compacted composition comprising alpha-cellulose, water and a pesticide in the form of a briquette, see Figure 5C; column 10, line 35 to column 11, line 6, lines 16-35 and column 12, lines 4-33; column 14, lines 66-67; Example 2, bridging columns 17-18 and lines 31-36 and 45-50 of Example 6 in column 20. Burns et al. also anticipate a method of controlling termite populations by delivering a housing comprising the compacted toxic termite bait material to a target surface, see claims 1-3, 7-9 and 12. While Burns et al. do not specifically mention alpha-cellulose as an ingredient, the cellulosic materials used by Burns et al. including sawdust, paper (claims 3 and 9), wood particles (column 5, lines 56-58), wood flour (column 11, lines 24-32 and Example 2) in the toxicant matrix material of Burns et al. would inherently comprise alpha-cellulose, see paragraph 0002 of the instant disclosure.
